RODERICK L. BREMBY, SECRETARY

KATHLEEN SEBELIUS, GOVERNOR

DEPARTMENT OF HEALTH AND ENVIRONMENT

March 31, 2005

Dear Interested Party:

State law requires that physicians, hospitals, and ambulatory surgical centers report abortions to the Kansas Department of Health and Environment (KDHE). The Women's-Right-to-Know Act requires physicians, who perform abortions, to report to KDHE the number of certifications received. This report is a preliminary analysis of these data, collected by the KDHE Center for Health and Environmental Statistics.

In-state collection of 2004 abortion reports is complete. Other states have submitted information on 70 abortions performed on Kansas residents. Since other states may not collect information on all of the questions asked by Kansas, those answers are totaled as "not stated" with a footnote explanation. Because other states' data may continue to arrive, the *Kansas Annual Summary of Vital Statistics*, 2004, will contain the final abortion data analysis.

This report also contains information the law requires providers to report regarding abortions performed at 22 weeks or greater and partial birth procedures. No partial birth procedures were reported in 2004, the fifth year in a row that none were reported. Detailed information about one abortion – performed at 22 weeks or greater to a Kansas resident in another state – is not available as that state does not collect the information.

Please feel free to contact me with any questions you have.

Sincerely,

Lorne A. Phillips, Ph.D. Director and State Registrar

Center for Health and Environmental Statistics

2004	11,427	5,475	5,952	0		

^{*} The increase in the 1989-1992 figures may not reflect an increase in the number of abortions being performed but rather an increase in the number of providers voluntarily reporting data.

Corrected 2004 Kansas Residence & Out-of-State Resident Totals

^{**} As of July 1, 1995, reporting became mandatory for every medical care facility and every person licensed to practice medicine and surgery.

^{***} Residency data was not available for all abortions in 1989-1990. However, due to improved reporting, residency was obtained for most of the abortions reported in subsequent years.

Abortions Performed at 22 Weeks or More Statistics

Physicians reporting abortions performed at 22 weeks or more were required to fill out three numbered questions on the back of the VS-213 form. The questions and answers are provided below for Kansas and out-of-state residents. Data represent reported abortions for the past calendar year. A sample VS-213 form is contained in the appendices.

"Partial Birth" Procedure Statistics

Physicians reporting "partial birth" abortions were required to fill out three numbered questions on the back of the VS-213 form. Those questions and the answers are provided below for Kansas and out-of-state residents. The questions would be in addition to those filled out if gestation was 22 weeks or more. All data are occurrence. The data represent a full year of reporting. A sample VS-213 form is in the appendices. No "partial birth" abortions were reported in 2004 in Kansas.

Number of "partial birth" procedures
